

The retro look of this freestanding bath is updated with a contemporary, ergonomic design. The focal point of any bathroom, it adds a further touch of elegance to a suite that is the epitome of luxury. The soft, sinuous lines of this bathtub are embellished with four metal handles in three exclusive finishes (Greige, Brushed Steel and Chrome). These handles are beautiful and functional details that match the rest of the collection. The bath is manufactured in Roca's exclusive material, Surfex®, which allows seamless units to be created in shapes that are unachievable in other materials and produces a soft, anti-slip, matte texture that is pleasant to the touch. The selection of resins and minerals in its composition also provide superlative resistance to impacts, abrasive chemicals and ultra-violet light, ensuring the unit retains its original colour and condition over time. Moreover, Surfex® provides superlative thermal resistance for greater energy efficiency in your home. Available in an Off-white finish with stylish, functional handles to suit your specific comfort and safety needs and match your brassware.
